Grid Code
Modification Recommendation Form

Title of Recommended Proposal: Generator Declared Inflexibilities stranded definition

MPID (EirGrid Use Only): 351

Date:	22 September 2026
Recommended at GCRP Meeting:	25 June 2026
Grid Code Version:	16
Grid Code Section(s) Impacted by Recommended Proposal:	Definitions

The Reason for the Recommended Modification:

The definition of "Generator Declared Inflexibilities" is no longer aligned with the current Grid Code framework. The term appears only in the glossary and is not referenced in any operative provisions.

The original definition refers to a clause that no longer exists in the current code structure, and the associated obligations have since been incorporated into broader provisions within SDC1 without reliance on this term.

As such, the definition is redundant and its continued inclusion introduces potential ambiguity without providing functional value.

It is proposed to remove the definition, subject to confirmation that it is not required by external frameworks. This is a clarificatory change and has no impact on existing operational or market processes.

History of Progression through GCRPs, Working Group and/or Consultation:

The modification proposal was presented to the Grid Code Review Panel (GCRP) at the meeting held on 25 June 2026. The proposal was discussed with no concerns or objections raised. The GCRP members agreed that the modification may proceed through the Grid Code modification process and be submitted to the Commission for Regulation of Utilities (CRU) for review and a decision.

DRAFT

Summary Note of any Objections to the Recommended Change from GCRP Members or Consultation Responses: No objections were raised by the GCRP members in relation to the proposed modification.
Outcome of any GCRP Meeting Actions Relating to the Recommended Modification: No GCRP meeting actions were raised in relation to the proposed modification. The panel agreed that the recommendation paper may proceed to the CRU for their review and a decision.

A Table Outlining the Proposed Changes:

	Red Line Version Text ***Deleted text in ~~strike-through red font~~ and new text highlighted in blue font***	**Green Line Version Text**
Definitions	**~~Generator Declared Inflexibilities~~** ~~The inflexibilities declared by a Generator to the TSO under SDC1 and which the TSO must take into account under SDC1.4.5.3 when compiling the Indicative Operations Schedule.~~
