Total TSO Contracted Wind: 2053.45

Note:

When wind farms are a mix of capacity from different Gates the Gate that includes the majority of the capacity is assigned. Projects with a non-wind element to their generation plant will be recorded in the contracted TSO (Non-Wind) list.

*Signed Date: This refers to the date that reflects the most recent contract signed affecting the capacity and not necessarily the date a contract was originally signed e.g. in the case of a relocation the date used is the date of the new contract not the original one. It would not however be updated for a non-MEC related amendment e.g. turbine or name change.
