Controllability Status Update

January 2026

EirGrid SONI

1 Introduction

The SEM-11-062 decision paper[1] identified a three-level hierarchy classification for Wind Farm Power Stations (WFPS) in Ireland and Northern Ireland; level (i), (ii) or (iii).

On 24th of March 2017, the SEM Committee confirmed that on an interim basis solar and tidal generation is entered onto the priority hierarchy in the same position as wind generation. This is without prejudice to the outcome of any future consultation arising from a wider review of the original decision.

Power Park Modules (PPMs) is a new generic term used in this document to represent specific technology types of Wind Farms, Solar and Tidal units. During this interim time period, all process notes referencing WFPS are applied to PPMs.

This document outlines the list of all Controllable PPMs, 5MW or more on the EirGrid and SONI systems. Each unit is categorised as level (i), (ii) or (iii). The technology types are listed and identified as appropriate within the tables. This list will continue to be updated on a monthly basis.

(iii)	96.35	100.9	71.5	21.5	76.4	399.2
Total	5827.424	5848.924	5848.924	5848.924	5903.824	6235.124

1.2. Northern Ireland

PPMs connected in Northern Ireland (MW)	February 2025	March 2025	April 2025	May 2025	June 2025	July 2025
(i)	16.9	16.9	16.9	16.9	16.9	16.9
(ii)	1215.24	1215.24	1215.24	1215.24	1215.24	1215.24
(iii)	0	0	0	0	0	47.3
Total	1232.14	1232.14	1232.14	1232.14	1232.14	1279.44

PPMs connected in Northern Ireland (MW)	August 2025	September 2025	October 2025	November 2025	December 2025	January 2026
(i)	16.9	16.9	16.9	16.9	16.9	16.9
(ii)	1192.32	1262.57	1262.57	1262.57	1262.57	1262.57
(iii)	77.3	17.04	17.04	17.04	17.04	17.04
Total	1286.52	1296.51	1296.51	1296.51	1296.51	1296.51

1.3. Process Notes

- Categorisation Policy Document - 5th March 2012.[2] [3]
- Performance monitoring of controllability requirements - 1st February 2013.[4]
- PPMs are obliged to achieve Compliance Certificate within 12 months of energisation. (Operational Certificate, Operational Certificate Justification or Final Compliance Certificate). The Notification list process applied to PPM's without Certificate is published.[5] In line with the CER decision[6], an additional timeline (one month per 10MW or part of) for PPM's with a Registered Capacity of >50MW is applied.
- Notification list for testing is published.[7]
- Category (i) PPM may involve the use of circuit breaker for dispatch purposes. These PPM's shall consider the appropriate procedures to bring the PPM back online (either remotely or by personnel on site) when the curtailment or constraint has been removed by the TSO.
